
DI under Sample Translation and Rotation in a 2D Population
Observed sample
Medoid
(a) Shifted sample
Moved right and down; DI = 0.000
(c) Rotated sample
Rotated 30° counterclockwise; DI = -0.085
(e) Rotated and shifted sample
Rotated 30°, then moved right and down; DI = -0.085
(b) Shifted sample
Moved left and up; DI = 0.000
(d) Rotated sample
Rotated 75° counterclockwise; DI = 0.009
(f) Rotated and shifted sample
Rotated 75°, then moved left and up; DI = 0.009
