
Translation and Rotation Properties of DI ($n = 20$)
Observed sample after transformation
Original sample position
Original-to-transformed movement
IPnM medoid (reference unit)
Optimal medoid–sample match
(a) Original sample
Starting configuration
DI = 0.000; MI = -0.474; VI = 0.006; BI = 0.039
(b) Shifted sample
Same shift applied to all four points
DI = 0.000; MI = -0.436; VI = 0.026; BI = 0.081
(c) Rotated sample
Rotated 30° counterclockwise about the sample center
DI = -0.107; MI = -0.336; VI = 0.118; BI = 0.166
(d) Rotated and shifted sample
Rotated 30°, then shifted right and down
DI = -0.108; MI = -0.283; VI = 0.125; BI = 0.170
